Aquafitness

Aquafit is exercising through movement in water. Water generates natural 'resistance' which facilitates a full-body workout at your own pace and intensity. Buoyancy promotes 'low impact' movement by decreasing the shock transmitted through your bones and joints.

Aqualite:

For beginner to experienced exercisers looking for low intensity, low impact class in shallow water.

Aquafit:

For all levels of exercisers looking for a low impact, high intensity class in shallow water. These classes feature full body strength, flexibility and cardio training.

Deep Water Aquafit:

For intermediate to experienced exercisers looking for a no impact, high intensity class in deep water. These classes feature full body strength, flexibility and cardio training and require flotation belts which are provided.

Canada Games Aquatic Centre: effective January 3-March 16, 2012

Safe to Participate - PAR-Q and You

Being more active is very safe for most people; however, some people should check with their doctor before they start becoming much more physically active. All Aquafit participants must review the Physical Activity Readiness Questionnaire

(PAR-Q) prior to participation. If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age and you are not used to being very active, check with your doctor before participating. For more details, please talk to the instructor or visit kamloops.ca/swim.
